

## Linking Desktops to MOTOTRBO Radios

### Do you want to ...

- ... Send text messages to MOTOTRBO radios from your computer?
- ... Send text messages to groups of MOTOTRBO users with similar skills?
- ... Be assured that people take responsibility and completed tasks assigned to them?

### We can provide value to your business by ...

- ▶ Installing a desktop application enabling text messaging to MOTOTRBO radios.
- ▶ Improving efficiency by automatically selecting the right person for the job.
- ▶ Escalating tasks to ensure that action is taken and jobs are completed.
- ▶ Providing a reporting tool detailing task allocation and response times.
- ▶ Providing a scalable solution to support process improvement and growth.

### ZONITH Alarm Control System

- ▶ Enables users to text MOTOTRBO radios from any computer.
- ▶ Matches the task to the scheduled groups of resources qualified to manage the job.
- ▶ Automatically dispatches the task to MOTOTRBO radio users.
- ▶ Enables users to accept or reject a task, triggering an escalation to ensure action.
- ▶ Records all task assignment history and response times.

### Solution Overview

This is a single installation combining three elements. The first is a desktop text editor. The second identifies the available people with the required skill set to manage the task. The third automatically dispatches the task details to the display of the selected MOTOTRBO users.
