LET DCRS MAKE YOUR SYSTEM PROFITABLE

Shopwatch and Pubwatch are Crime Prevention Schemes for local retailers/publicans situated all over the UK bringing them and the police together in the fight against crime in stores and on the streets.

As a market leader **DCRS** were one of the first to develop the revolutionary Shopwatch scheme giving real peace of mind in the event of a shoplifting, or security incident. We will provide you with a very economical solution to combat theft and anti-social behaviour, in your town or city.

Our systems are designed to keep all users in immediate contact with each other, the police and CCTV via a state of the art two-way radio system, supported and maintained by **DCRS** Ltd. All members on the scheme will be communicating effectively to help identify potential criminals, prevent crime and increase staff confidence and security.

To maximise the benefits of Shopwatch and Pubwatch schemes we can extend it to other smaller towns and urban shopping areas.

KEY FEATURES AND BENEFITS

- No initial set up costs, no capital expenditure required - we will install all infrastructure for free, CCTV / Police will receive free radio.
- Only 12 users are required to set a system up.
- **DCRS** will perform a full site survey prior to the installation and delivery of radio equipment. This will be performed free of charge.
- **DCRS** will complete all necessary applications to OFCOM ensuring no delays in launching your radio system.
- Design of bespoke application packs including all promotional information and necessary application forms.
- If requested **DCRS** will send out all application packs to a database of potential retailers and then follow them up utilising our dedicated telesales department.
- We can invoice your Shopwatch/Pubwatch membership fees on the same invoice as the radio hire - reducing paperwork, time and effort you would normally spend on this task.
- We will utilise our credit controllers to chase payments of outstanding invoices.
- Upon delivery of the system **DCRS** will offer full and comprehensive training to all users as well as distributing a user guide.

DCRS

DIGITAL RADIO SYSTEMS

By hiring the radio equipment from **DCRS**, individual businesses will always be reassured in the fact that **DCRS** offer a next working day service exchange policy.

The equipment will always be owned by **DCRS** and 'hired' directly to the individual businesses. If the partnership contacts **DCRS** then we will always aim to dispatch a replacement radio that same working day. At a later date we will then collect our faulty equipment and return to our stock.

We can truly boast this policy as we currently have a 'Hire Fleet' comprising of approximately 6000 Digital Two-way Radios.

All hired equipment is covered by our 'no quibble', next working day, service exchange policy including aerials, batteries, audio accessories and chargers.

All Radios come complete with aerial, lithium ion battery, belt clip and charger. Each radio is invoiced on a per week, per radio basis, paid quarterly in advance and can be invoiced directly to the individual businesses.

HYTERA PD705
DIGITAL PORTABLE RADIO

FEATURES OF MOTOROLA HAND PORTABLES:

ID on PTT - Every time a radio is used e.g. to transmit, the radio's unique ID is displayed on the screen of the control radio.

Radio Enable/ Disable - If a radio is lost/ stolen then using a control radio you will be able to 'Stun' the radio rendering it useless.

Emergency Button - All radios will have the emergency 'red' button activated offering a hands free solution in an emergency situation.

Call Alert - This feature can act as a pager system. Again the control radio can 'dial' the number of the radio they wish to alert. The radio selected will ring (like a telephone) until answered. *(The radio initiating the call will automatically receive an acknowledgment back confirming the radio was 'switched on and in range' and that the pager message was received).*

MOTOTRBO™ DP4400
DIGITAL PORTABLE RADIO

RADIO HIRE FOR SPECIAL EVENTS

DO YOU NEED RADIOS FOR A SPECIAL EVENT SUCH AS A: CONCERT, CONTINENTAL MARKET, STREET FAIR?

If so you will be pleased to know that our hire charges have not increased in over 5 years and we have also added another 650 portables to our hire fleet taking the total to 6000 to accommodate the ever increasing demand!

We offer local, on site, city and wide area radio systems utilising the latest Motorola products.

A Complete Package: Each radio comes complete with all the necessary equipment and a free of charge licence to cover all your equipment whilst it is in your care.

Peace of Mind: A dedicated, knowledgeable team available to help 24/7.

Identification: For ease of identification we can: number, name or colour code all your equipment.

The Personal Touch: If required we can personally deliver and set-up your equipment.

We are anticipating another busy year for our hire department and recommend that you book early for any requirements you may need throughout the remainder of the year.

MOTOTRBO™ DP4800
DIGITAL PORTABLE RADIO

ENHANCE SAFETY AND INCREASE OPERATIONAL EFFICIENCY WITH RADIO APPS

Job Ticketing allows customers to easily manage the flow of alarms and tasks by providing a simple drop down menu of predefined responses.

Expand coverage to more of your users, wherever they work, with the push of a button. Making it possible to communicate across a wide area by linking single sites across an IP network.

Allowing you to communicate with MOTOTRBO™ users and talk groups with an easy-to-use Android or iOS application on your smartphone or mobile device.

A professional grade application especially developed for Dispatch centres that monitor large amounts of traffic.

Allows for multiple digital base stations to be connected over an IP network thus providing you with a wider area of coverage.

Dispatches alarms from any alarm source to your: digital radio, GSM mobile phone, pager or just to an email account.

Allowing voice, data and tracking on the same network, at the same time.

Connect your radio and telephone network together to work as one. Digital radios can have features such as: speed dials, contact lists and voicemail.

Allows recording, logging and playback of any call on two-way radio networks or phone to radio conversations.
